

CLAY

EXCEED® PRECOAT FOR TRUE CLOVER

This clay inoculant is intended to be applied on-seed. It is a culture of highly effective strain of rhizobia (nitrogen-fixing bacteria) that will colonize the plant roots to gather and fix the “free” nitrogen of the air, making it available to the plants.

Product 6005

Treats 5,000# (2,268 kg) of seed

Net Weight 42 lbs (19 kg).

Package Configuration: 1 packages/case, 45 cases/pallet

CONTAINS NONPLANT FOOD INGREDIENTS

Minimum Guaranteed Analysis

Active Ingredient: <1% by Weight

Leguminosarum biovar trifolii: 1x10⁸ CFU/g

Inactive Ingredients: >99% by Weight

KEEP OUT OF REACH OF CHILDREN

This product does not meet the regulatory definition of a hazardous chemical under 29 CFR 1910.1200. However, good industrial hygiene practices should be used in the manufacture and handling of the product.

Precautionary Information:

While EXCEED® PreCoat for True Clover is non-toxic it is recommended that the applicator avoid inhalation. Visjon Biologics recommends the use of gloves and eye protection while using EXCEED® PreCoat for True Clover.

Directions for Use:

- Use EXCEED® PreCoat for True Clover to inoculate only the legume(s) designated on this package.
- Use before the expiration date marked on the package.
- Label seed with the same expiration date if intended for resale.

Dry Application

- EXCEED® PreCoat for True Clover should be applied to dry, clean seed.
- EXCEED® PreCoat for True Clover will naturally adhere to the seed. Do not use water to wet the seed or use any sticking agents or adhesives.
- Apply inoculant at a rate of 8 oz (226.8 g) per 60 lbs (27.2 kg) of seed.
- Allow product to thoroughly mix with seed; treated seed should appear white.

Coating Application

- EXCEED® PreCoat for True Clover can be used as a pre-inoculant in seed coating or build-up process.
- It is important to allow the seed coat to be permeable by oxygen. Use this product before the expiration date; label seed with the same expiration date if pre-inoculated seed or coated seed is for re-sale.

Re-inoculation of previously inoculated seed

- Slowly screen seed to shake off excess inoculant material.
- Re-Inoculate with EXCEED® PreCoat for True Clover, following the recommended application rates and expiration dating.

Inoculation of seed mixtures

- Inoculate each legume seed component of the mixture separately using the appropriate rhizobial strain for each legume.
- Blend the pre-inoculated components together into final seed mixture for bagging.
- Label the seed bag tags with the expiration date of the inoculant which expires first.

Storage of EXCEED® PreCoat for True Clover:

- Always read and follow instructions.
- Store in a cool, dry place out of direct sunlight.
- Store product between 40° and 77° F (4° and 25° C.)
- Open package only when ready to use.
- Use before expiration date.
- Do not store in an area which is to be fumigated.
- Small amounts of product which cannot be used according to instructions may be disposed of in a landfill.

Expiration Date:

EXCEED® PreCoat for True Clover carries a 18-month shelf life and expires the date marked on the case.
